PROFILE

Leading with authenticity and a growth mindset, I am a fantastic team player who believes in constantly learning. Through my hard work and dedication, what I can achieve has no limit simultaneously working daily to excel for the goals of an organization.

EMPLOYMENT HISTORY

Space Invaders Social , University of Denver

McKinney

Jul 2022 — Aug 2022

- Executed my understanding of JavaScript, HTML, and CSS within a team setting.
- Diligently collaborated with a team and communicated effectively in order to maintain alignment and team synergy.
- Met an aggressive deadline with a smile on my face and overcame obstacles of GitHub merges with zero conflicts.
- Designed presentation and delivered magnificently.

Not Your Average Book , University of Denver

McKinney

Jul 2022 — Aug 2022

- Achieved a deliverable application that promotes literacy in America and a better future for its youth.
- Identified learning opportunities with data implementation and sought resolutions for long term return of investment.
- Front-end focus with design and user experience at top priority.
- Generated scripting and presentation, coached team mate in order to share presentation, our delivery was marvelous.

ConnectKids, University of Denver

McKinney

Oct 2022 — Oct 2022

- Developed an inclusive application to connect parents and their children events without exclusions. Inclusive features such as wheelchair access to events and sensory events for the autistic community as well, providing the ultimate experience for everyone involved.
- Promoted mental health and wellness by easing the process of initial physical events by offering virtual cooking and connection events.
- Project manager and organizer of Kan-Ban board and back-end focus.

EDUCATION

Certificate , University of Denver

Denver

Jul 2022 — Oct 2022

Attended and completed certification at accredited University for full stack development.

Specialized in MERN technologies, SQL, and executed compressed program by utilizing organizational and prioritization skills. With my passion for constantly learning , and discipline; I was able to break down barriers and unlock a new and striking career in Software Development.
